SUMMARY

Full-Stack Web Developer & Team Lead with 2+ years building production-grade web applications with Next.js, React, TypeScript, and Node.js / Laravel. Led the development of a multilingual education platform end-to-end — owning the architecture, a headless CMS, performance, and security. Looking to contribute to and grow within a strong engineering team.

TECHNICAL SKILLS

- Frontend:** Next.js (App Router, Server Components), React, TypeScript, Tailwind CSS, JavaScript (ES6+)
- Backend / CMS:** Node.js, Express, Laravel, tRPC, Prisma, Payload CMS, REST APIs, Firebase
- Databases:** PostgreSQL, MySQL, MongoDB
- Infra & DevOps:** Cloudflare (CDN, R2, Turnstile), Git & GitHub, CI/CD, VPS deployment
- Practices:** Performance optimization, Web security (CSP, CSRF, rate limiting), automated testing (Playwright, Vitest), SEO (JSON-LD, hreflang), i18n (RTL), RBAC

PROFESSIONAL EXPERIENCE

Eaalim Institute Giza, Egypt

Full-Stack Web Developer & Team Lead — Apr 2025 – Present

- Led a 3-developer team and built the institute's production education platform from scratch with **Next.js 15** (App Router, Server Components), **React 19**, and **TypeScript** — serving 700+ families across 15+ countries (UK, Europe, North America).
- Architected a headless CMS (**Payload + PostgreSQL**) with 15+ collections, role-based access control (7 roles), and a manual database migration workflow.
- Built a multilingual experience (English / Arabic / French) with full **RTL** support, per-locale routing, and hreflang SEO, plus an interactive Quran reader with a Fabric.js drawing canvas.
- Engineered multi-layer caching (Next.js ISR + Cloudflare edge), cutting TTFB from ~480ms to ~50ms on cache hits and reducing page payloads by 80%+.
- Implemented security hardening across the platform: CSP, CSRF protection, rate limiting, Cloudflare Turnstile, and JWT-based admin authentication.

Frontend Developer — Jan 2024 – Apr 2025

- Built responsive, high-performance interfaces with Next.js, React, and Tailwind CSS, then grew into full-stack ownership and a lead role.

PROJECTS

Eaalim Platform (eaalim.com) — Multilingual education platform built with Next.js 15, React 19, TypeScript, and Payload CMS (PostgreSQL): interactive Quran reader, multi-layer caching, and security hardening, deployed on a VPS behind Cloudflare.

Eaalim Lessons — Arabic-first interactive e-learning platform on a modular-monolith + plugin architecture (55 lesson-block types): drag-and-drop lesson builder, Stripe billing, i18n (EN/FR, RTL), and a full CI / testing pipeline. Built with Next.js 16, tRPC, Prisma, and PostgreSQL.

EDUCATION

University Student & Self-Taught Full-Stack Developer — building production web applications while studying.
